

Cleaning Tips

Oven: Place a layer of foil in the bottom of the oven to collect spills. Replace when dirty.

Grill pan: Place a layer of foil in the pan so it covers the top edges. This will catch all grease and fat. Replace after each use.

Grills: Once every couple of weeks, soak these overnight in biological washing powder, they will come up as new! Do the same with the gas hob bits.

Shower: After each shower, use a shower descale spray on the shower screen and shower head and ventilate the room to avoid mould, i.e. open windows for at least 30 minutes.

Toilet: Pop a bloo in the cistern and replace when necessary.

Kitchen Surfaces and floors: Don't let stains or mess build up or the mice will start to get interested very quickly. Sweep the floor and dispose of any food mess.

Waste Bags: Use the bins provided for the bin bags. Rats and cats love exposed bin bags.

Carpets: Vacuum regularly to stop ingrained dirt building up in the pile. If you spill something then treat immediately to avoid staining.

Beds: If there is not mattress protector for your bed then ask your landlord or invest in one, you can pick them up for less than £10. Any stains on the mattress you will be liable for.
